

NEAR VISION SCREENING COMPETENCY ASSESSMENT DOCUMENTATION

Check when demonstrated by screener	COMPETENCIES: Essential Steps for Accurate Screening <i>Licensed Health Care Professional observes screener accurately performing these steps in sequence with minimal coaching:</i>
	1. Assemble required equipment and supplies. In addition to eye chart and accurate floor distance measurement, as required for distant vision screening, this screening also requires the use of +2.50 diopter lenses, suitable for the student holding in front of their eyes to view the vision chart.
	2. After the child completes distant vision screening, instruct him or her to remain in place, heels on the line of measurement from the chart, and briefly close and rest the eyes. The child is instructed (or provided demonstration) of holding up the diopter lenses in front of the eyes as one would hold opera glasses. Correct recognition of more than half the letters, pictures or symbols on the 20/30 line, viewed through the diopter lenses, constitutes a “ non-passing ” result.
	3. Record results
	4. Carry out rescreen and notification procedures per local school practice/policy

SCREENER NAME AND DATE OF OBSERVATION BY HEALTH CARE PROFESSIONAL:

The above-named individual has been observed by the licensed health care professional identified below, as competent in performing the tasks identified above, using the following equipment:

- ☐ _____
- ☐ _____
- ☐ _____

Licensed Health Care Professional Signature: _____

Health Care Professional Name Printed

License No.

Date
